VISUAL APPEARANCE / ENVIRONMENTAL QUALITY

A full point should be awarded in a category only if the amenity is outstanding. If not best in each category, rate down 1/2 point.

	0 Points	1/2 point	1 point		
FUNCTION & IDENTIFICATION OF SIGNAGE AND ENTRANCE TO PARK (Assessing sign and entrance to access the park):	Entrance is difficult to see. Access into or out of the park is dangerous. No sign or sign difficult to identify, poorly maintained or difficult to read. Not illuminated and not readable at night.	Entrance is clearly visible with safe access into and out of park. Sign that is well-maintained, easily seen and read from distance and at night, illuminated by street lights or reflective material.	Entrance is clearly visible with safe wide easy access in and out of park. Well maintained professional quality sign that is easily seen and read from distance and is illuminated with flood lights or back lights. Park entrance has an invitingly landscaped appearance with a ground cover (grass, decorative rock or bark) Plus at least two of the following: trees, shrubs, flowers, landscaping timbers, or ornamental vegetation appropriate to climate, free of litter and roadside debris and carefully manicured. Landscaping of common areas (noncampsite) is consistent throughout the park, includes a ground cover (grass, gravel, decorative rock or bark), and a significant quantity of trees, shrubs, flower landscaping timbers, or ornamental vegetation appropriate to climate. Landscaping is carefully manicured (trees and plants trimmed and pruned, grass is mowed, edged and weeded, leaves raked no grass, weeds or ground cover growing or creeping onto RV parking area).		
APPEARANCE OF ENTRANCE AREA (An assessment of the area and frontage extending 50' each side of entrance way):	Park entrance is not landscaped, or landscaping is minimal and/or poorly maintained with excessive litter or roadside debris is present.	Park entrance is reasonably landscaped with a ground cover (grass, decorative rock or bark) plus one of the following: trees, shrubs, flowers, landscaping timbers, or ornamental vegetation appropriate to climate, free of most litter and/or roadside debris and well-maintained.			
APPEARANCE OF PARK GROUNDS (An assessment of common areas excluding RV Sites):	Common areas (non-campsite) of park sporadically landscaped or poorly landscaped. Not maintained or overgrown with weeds or other vegetation.	Landscaping of common areas (non-campsite) is consistent throughout the park, includes a ground cover (grass, gravel, decorative rock or bark), and a limited quantity of trees, shrubs, flowers, landscaping timbers, or ornamental vegetation appropriate to climate. Landscaping is well-maintained (grass mowed, leaves raked, trees trimmed).			
APPEARANCE OF SITES (An assessment of overnight RV sites only):	Sites not landscaped or poorly or minimally landscaped, or unmaintained (overgrown with weeds or other vegetation).	Site landscaping is consistent throughout the park in all overnight-type sites. Landscaping is regularly scheduled and maintained (grass mowed or between regular cuttings, leaves raked, trees trimmed). And includes a ground cover (grass, gravel, pavement, decorative rock or bark) plus one of the following: trees, shrubs, flowers, landscaping timbers, privacy screens, or ornamental vegetation appropriate to climate.	Site landscaping is consistent throughout the park in all overnight-type sites and includes a ground cover (grass, gravel, pavement, decorative rock or bark) and at least two of the following: trees, shrubs, flowers, landscaping timbers, privacy screens, ornamental vegetation appropriate to climate, patio, table or fire p (all in good condition). Landscaping show evidence of constant maintenance and is carefully manicured (trees and plants trimmed and pruned, grass is mowed, edged and weeded, leaves raked; no grass, weeds or ground cover growing or creeping onto RV sites).		
LITTER AND DEBRIS AROUND PARK GROUNDS AND SITES, including fire pits (An assessment of litter and debris around entire park and sites):	Park grounds area around buildings and/ or sites (including fire pits) are littered with refuse, clutter, or debris. Seasonal or long term sites are in view of overnight sites and have an unacceptable amount of refuse, clutter & debris.	Park grounds area around buildings and/ or sites (including fire pits) are reasonably free of refuse, clutter, or debris. Seasonal or long term sites are in view of overnight sites are reasonably free of refuse, clutter & debris.	Park grounds area around buildings and/ or sites (including fire pits) and RVs are fre of all refuse, clutter and debris. Seasonal or long term sites are in view of overnight sites are free of refuse, clutter & debris.		
OVERALL EXTERIOR BUILDING MAINTENANCE (An assessment of all buildings except bathroom buildings):	Buildings including doorways and windows require major repair or painting or web removal or cleaning or maintenance. Roof and gutters require major repair. Walkways around buildings are unsafe and require major repair.	Some or all buildings including doorways and windows require some cleaning or web removal or painting or minor repair. Roof and gutters require some minor repair. Walkways around buildings safe but require some minor repair.	All buildings including doorways and windows, clean in appearance, free of webs and in good repair. No repair require to roof or gutters. Walkways around buildings, safe and no repair required.		
TRASH DISPOSAL:	No trash receptacles or trash receptacles overflowing. Receptacles not regularly emptied.	Trash receptacles of ample capacity, well maintained, regularly emptied, located more than 500' from 50% of overnight sites.	Trash pickup at site daily and/or receptacles of ample capacity, well-maintained, regularly emptied, located les than 500' from 50% of overnight sites.		
NOISE:	Park is located in flight path of nearby major airport or active military airstrip. It borders an active railroad track, interstate or heavily traveled major highway or industrial or commercial area which results in frequent, major noise pollution.	Park is close enough to the following: airport, active railroad track, interstate or heavily traveled major highway or industrial or commercial area which results in occasional, moderate noise pollution.	Park is distant enough from the following: airport, active railroad tracks, interstate or other heavily traveled major highways, industrial or commercial areas which results in minimal noise pollution. People are able to converse in a normal tone of voice.		
PARK SETTING:	Park and sites have no natural or man- made visual barrier that shield park from commercial, industrial, or residential surroundings on all four sides and is a major detraction from the parks setting.	Park and sites are shielded from commercial, industrial or residential surroundings by a manmade or natural visual barrier on at least two sides and has some impact on the parks setting.	Park and sites are shielded from commercial or industrial or residential surroundings by a manmade or natural visual barrier on all four sides and does no detract the parks setting.		
SITE LAYOUT:	Greater than 50% of sites have side-by- side hookups. Sites measure less than 20 feet between RV parking space from pedestal to pedestal, perpendicular to the	Less than 50% of sites have side-by-side hookups. Distance between the majorities of parking space from pedestal line to pedestal line, perpendicular to the site is a	There are no side-by-side hookups. All sites measure 30 feet or greater between parking space from pedestal to pedestal, perpendicular to the site. Entry and exit int

COMMENTS:		

IMPORTANT NOTICE: Good Sam's exclusive triple rating is copyrighted and may not be used on any other promotional material, including billboards, signs, brochures and the like without written permission from the publisher. If permission is granted, the rating must be used in its entirety. When the conditions at the park warrant a rating change, the park is responsible for any and all costs involved in posting the corrected rating, which must correspond to the rating published in the most current edition of the Good Sam Guide.

In order to maintain Good Sam status, campground overnight rates must be posted and clearly visible or provided on preprinted rate sheets.

These are only rating guideline excerpts. Your Consultant's determination of your rating is final. Good Sam Campground affiliation is a privilege, not a right, and membership is the sole decision of the consultant.

CAMPGROUNDS & RV PARKS

A full point should be awarded in a category only if the amenity is outstanding. If not best in each category, rate down 1/2 point. Defintion of all-weather surface: unpaved surface that is constructed of crushed concrete, crushed stone, crushed shell, brick or gravel, compacted materials, deep enough that does not create mud during rainfall or kicks up dust in dry conditions.

	0 Points				1/2 point	1 point
INTERIOR ROADS (Assessing all roads used by overnight RVer in park):	Grass, dirt, pine needles, sand or gravel/dirt. Narrow, steep or hazardous. In poor condition (potholes, ruts, or tree roots.)			s. In poor	Gravel, stone, shell or highly compacted sand or all weather surface. Reasonably mud/dust free with good drainage and the surface is in good condition and/or less than 12' wide. 14' overhead clearance across the full width of the road.	Paved (asphalt, concrete, or chip seal) or all-weather roads professionally constructed with good drainage and the surface is in superior condition (very few potholes or cracks in surface pavement). That is dust/mud free. Roads have adequate maneuverability. Roads are a minimum 12' wide for one-way, or 18' for two-way. 14' overhead clearance across t full width of the road.
REGISTRATION (Assessing how customers register, check in and pay for sites):	Self-service registration or part-time staff. Unsheltered outside pay window for office and registration, or no office exists. No registration procedure for off-hours. Greater than 50% of sites not level. Undesignated or unidentifiable sites with no prepared surface. Poor site drainage that may create mud/dust buildup in adverse weather conditions.				Part-time staff with regular posted hours of business. Enclosed office in residence or sheltered outside pay window. Signage clearly directs where to register. Registration procedure for off-hours.	Separate business office with full time staff and regular posted hours of busine Signage clearly directs where to register Registration procedures for off-hours.
SITES (An assessment of RV site construction, preparation and drainage):					Greater than 50% of sites are level and have easy access. Clearly designated or identifiable sites with a graded prepared surface of gravel, grass, dirt, shell, or all-weather surface in reasonable condition. Site drainage that is reasonably dust free of mud/dust buildup in adverse weather conditions.	100% of sites have easy access and 14' overhead clearance. Clearly designated or identifiable sites with paved (asphalt, concrete, or chip seal) or All-weather surface professionally constructed with good drainage and the surface is in goo condition that is dust/mud free. Minimal leveling needed for RV.
HOOKUPS (An assessment of water, electric and sewer hookups, pedestals and dump stations. Tent sites excluded):	Less than 50% of sites have water and electric hookups. Water, sewer or electric hookups are of sub-standard construction. Hookups are in poor condition. No dump station located in the park.				Greater than 50% of RV sites with 30 amp electric service and water hookups professionally constructed and in very good condition. Dump station located within the park is in good repair with faucet, hose, capped receptacle and surrounding catch basin or a waste disposal service (Honey	of sites have full hookups and remaining overnight and short term sites must hav
	FULL	W	S	E	Wagon).	all sites have 50 amps. All hookups are on driver's side or directly behind RV. A dump station with faucet, hose, capped receptacle and surrounding basin availat within the park or a waste disposal servi (Honey Wagon).
