

TRES RIOS RV PARK

Perfect Texas weather and a trio of rivers make this a destination resort

When choosing a destination, RVers look for a variety of options. Weather is always a consideration. If the RVer is active, then the number of nearby activities is important. And if the RVer is an angler, a canoer, a boater, or just enjoys water activities, then nearby water is a must. This makes Tres Rios RV Park in Glen Rose, Texas, the place to be. Meet friends while fishing, swimming in the pool, playing horseshoes, or fossil hunting in and around the rivers. With its traditional style buildings, Tres Rios was once the site of a YWCA camp and the home of Texas' first outdoor swimming pool.

Once onsite, choose from spacious RV sites nestled among native Texas pecan and oak trees on 47 spacious acres—full hook-ups with large pull-through sites. The friendly and helpful staff are ready to assist, including planning activities such as cards, bingo, stitching, potluck dinners, wood crafts, nature walks, and more.

But we haven't even touched on the water part of the resort. Tres Rios is named for the three Texas rivers that converge on the resort's southern point—the Brazos River, Paluxy

River, and Squaw Creek. The convergence of these three rivers creates a bluff on the south end of the resort that's a great place to view the natural beauty, wildlife, and breathtaking sunsets of Texas. The Brazos is popular for tubing, kayaking, and canoeing. The Paluxy is known for numerous dinosaur footprints found in its bed near Glen Rose. The three rivers assure visitors of water fun year-round. Not only are the waters great for fishing—the Brazos River is home to 44 fish species—but the area is a magnet for a large number of bird species including blue herons and bald eagles.

Tres Rios is a must-see resort in the Ocean Canyon system—especially when the bluebonnets are in full bloom in April. Visitors to the resort can enjoy trips to nearby Fossil Rim Wildlife Center and Dinosaur Valley State Park. Located on the Paluxy River, Big Rocks Park is full of unusually large rocks. Families can enjoy swimming and cooling off from the Texas heat, or enjoy lunch sitting underneath the trees.
